### INNOVATION FLEXIBILITY FREEDOM

DRY is a family of luminaires with an eye-catching effect. The variety in shape and the combination of an illuminated rod with an optional panel make DRY a very decorative and a functional luminaire. Its versatility allows you to adapt it for various projects and to use the same product family throughout your interior, easily adopting it in every office, hospitality or residential project. DRY is availabe in many installation options, like a pendant luminaire, stand-alone floor lamp or wall luminaire.

#### BY BOYAN CEGLAR

Like a chameleon changing its skin, Camaleo changes its form, texture and material structure. Whenever you want something new, there's no need to change the whole luminaire, but just its 'skin' – by sliding the old cover out and placing the new cover in. Simple as that.

KALA comes in different forms like rectangular, circular and in triangel as a standard. Additionally, its adaptable design enables the extension to other shapes and application.

With a 100 mm high profile and an even illuminated surface, KALA Shape is a universal,

but a bold luminaire as well.

TUBE 60

ORA Tube 60 is an extension to ORA family. Not just as a new member of the group, but also as a new possibility to connect it to the standard ORA 60 and form a unique application. Its specialty is the completely illuminated body, which makes the luminaire appearing like a tube.

Combining coloured end-caps and coloured cables, the luminaire gets playful and a creative addition to your interior.

Applications: linear pendant, ceiling and wall-mounted or in a hexagonal shape.

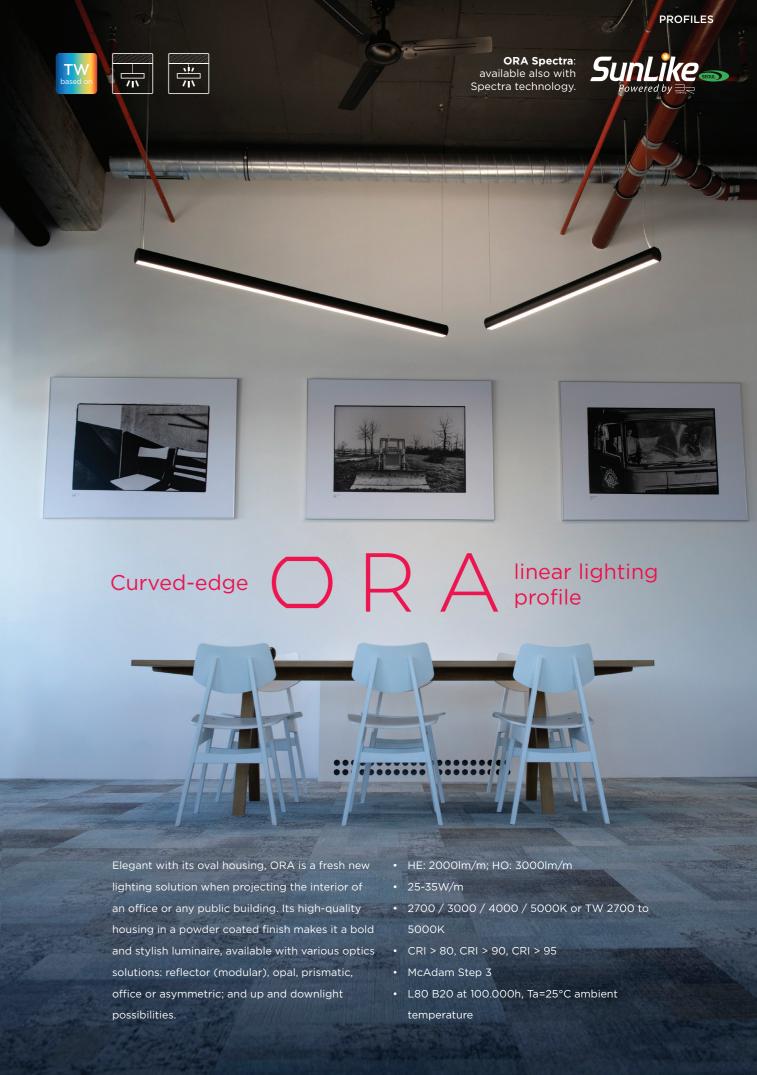

Next extension

TUBE MINI

A ray of light, 17 mm thin.

**ILO Spectra**: available also with Spectra technology.

The ILO luminaire is one of the most versatile profile solutions on the market. Designed for projects that demand a high quality lighting system and high visual comfort, it offers a vast selection of features, materials and performance features to choose from.
